NO MORE DEATH-LEADS

Illegally modified electrical leads can overload circuits resulting in fires, damaging property and causing injury.

Insurance does not cover damage caused by illegally modified equipment... so don't risk it: connect safely and legally with an Ampfibian®.

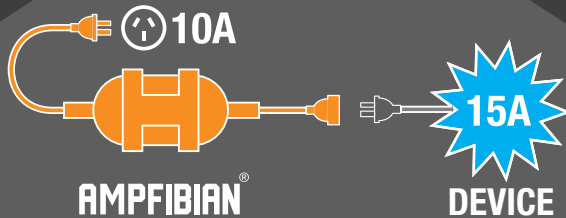

AMPFIBIAN PROTECTS

The Ampfibian MINI contains protection certified to comply with Australian electrical standards, allowing safe and legal connection between 10A and 15A. The Ampfibian MINI achieves this by cutting the current if it exceeds 10A.

The MINI also offers personal protection from electric shocks using a residual current device (RCD), which can be caused by faulty wiring or appliances.

- Complies with Australian Standards
- Recommended for indoor use (rated to IP33)
- L-Class rated for light / non-commercial duty
- Impact rated to IK08
- Safely connect to 10A domestic outlets
- Designed and made in Australia

For caravans and RVs we recommend the heavy-duty, weatherproof Ampfibian RV02-MAX. Approved for industrial use with an ingress protection rating of IP55 (360 degree sealing against garden hose jets, heavy rain and fine dust), it is the ultimate adapter when on the road.

1. CONNECT 10A (DOMESTIC) POWER TO YOUR AMPFIBIAN.
2. CONNECT AMPFIBIAN TO 15A DEVICE FOR SAFE & LEGAL INDOOR / UNDERCOVER USE!

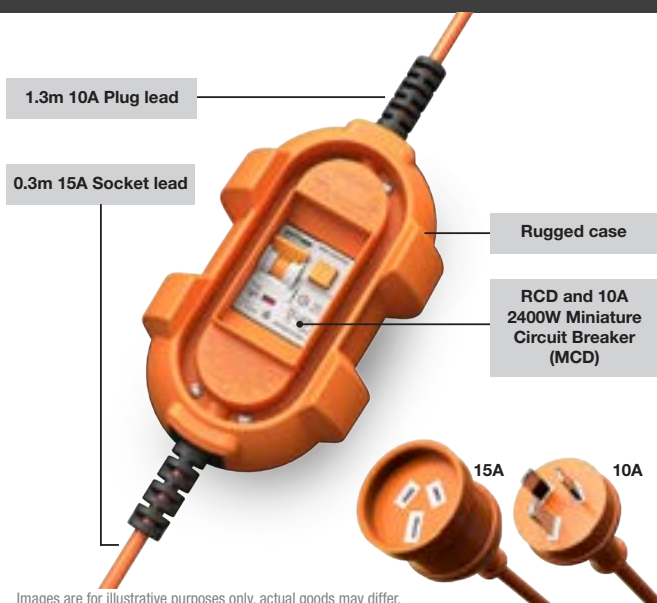

RCD+OVERLOAD

WHAT IT DOES

The Ampfibian MINI safely and legally connects any 15A device to a 10A domestic power supply.

A household powerpoint can safely supply 10A, while a 15A device can draw up to 150% more than that. That's why a 15A plug does not fit into a 10A household powerpoint.

Many people are using illegally modified plugs to circumvent this protection, putting themselves, their property and the lives of their loved ones at risk.

Images are for illustrative purposes only, actual goods may differ.

“The Ampfibian MINI is for people who want a high quality Australian made product, but don't need the weatherproofing or heavy-duty industrial features of the Ampfibian RV02-MAX.

“With addition of the MINI to Ampfibian's product range, people now have a choice of products to match their needs.”
