SPHERE WIRELESS ALARM SYSTEM

Protect your assets even when you're travelling!

Your RV is valuable, not only because of the beautiful memories it helps to create, but also because of the knick knacks inside its walls! Your RV is a treasure trove to would-be-thieves, so stop them in their tracks with the **NEW Wireless Alarm System Kit**.

The Kit comes with a control unit (this can be programmed to accept up to 5 accessories), a motion sensor, a door/window sensor and 2 key transmitters. The door/window sensor can be used on any entry point, even the service doors.

How does it work? If you're leaving your caravan for a while, lock it up as you would normally and then turn the system on with your key transmitter. If the bond between the door/window sensor magnets break, or the motion detector is triggered, the alarm will sound.

An alarm system may even have the potential to lower your insurance premiums, however we strongly recommend you consult your insurance provider to check this as individual circumstances may vary.
